

Concept 1: Glassmorphism Fintech

A premium, modern fintech aesthetic. Glassmorphism balance card with frosted-glass effect, circular tier progress ring, chip-style bucket breakdown, and quick action shortcuts.

Key Design Changes

- 1 Glassmorphism Balance Card:** Frosted-glass effect with subtle radial glow replaces the flat gradient. Feels premium and modern, like a credit card floating in space.
- 2 Chip-style Bucket Breakdown:** Instead of inline progress bars, buckets are shown as distinct chips with their own mini progress bars. Cleaner separation, easier to scan.
- 3 Circular Tier Progress Ring:** Replaces the linear progress bar with a ring chart — more visually engaging and immediately communicates completion percentage at a glance.
- 4 Quick Action Grid:** Promotes Gift Card, Balance Details, and Referral into always-visible icon buttons instead of burying them as text links at the bottom.
- 5 Human-readable Labels:** "EarnedCredit" → "Earned", "CodPending" → "COD Pending". Raw bucket type names are replaced with friendly labels throughout.
- 6 Compact Header:** Phone number shown as a masked badge in the header bar, freeing up vertical space previously used by the "Showing rewards for your account" banner.
