

Concept 2: Gamified Rewards

A playful, engagement-driven design that treats loyalty like a game. XP-based progression, achievement badges, streak tracking, and visual level-up milestones to drive repeat visits.

Key Design Changes

- 1 XP-based Progression:** Reframes "points" as "XP" with a gaming-style level card. The rainbow gradient top border and shield icon create excitement around tier progression.
- 2 Streak Tracking:** A "🔥 3-day streak" badge in the header gamifies return visits. Creates a habit loop — users check in to maintain their streak.
- 3 Achievement Badges:** Horizontal scrolling achievement row shows unlocked milestones (First Purchase, ₹100 Saved, Repeat Buyer) and teases locked ones. Drives engagement through collectible mechanics.
- 4 XP Earned per Transaction:** Each transaction shows XP earned alongside the amount. Reinforces that every purchase is progress toward the next tier.
- 5 Personalized Greeting:** "Hey there! 🙌" with contextual subtitle creates warmth. Could be personalized with name if available ("Hey Chirag!").
- 6 Separated Balance & Tier:** Balance is its own card (not competing with tier visually). Bucket breakdown uses colored dot pills — simpler and more scannable than progress bars.
