

3C: Summary Dashboard

Everything at a glance — profile + lifetime stats in the header area, a 4-stat grid replacing the simple row, and transactions with running balance. Hierarchy: who you are → full picture → progress → detailed history.

What's New in 3C

- 1 Profile Bar with Lifetime Stats:** Customer name, tier, order count, and member-since on the left. "Lifetime Saved: ₹1,240" on the right. The avatar with initials (PS) in the top-right replaces the generic Switch link. Full identity at a glance.
- 2 4-Stat Grid:** Replaces the 3-column row with a 2x2 card grid. Adds a fourth metric — "Expiring Soon" (₹45 in purple). Each stat is color-coded and gets its own card for better scannability. More room for labels.
- 3 Running Balance on Transactions:** Each transaction shows "bal ₹491.00" — the wallet balance after that transaction. Lets customers trace how their balance changed over time, like a bank statement. Builds trust and transparency.
- 4 Compact Date in Meta Line:** Instead of date group headers, the date is inline in the meta text ("Order #1042 · Mar 17"). Saves vertical space and works better when transactions are sparse.
- 5 Information Hierarchy:** Identity + lifetime value → current balance → bucket breakdown → tier progress → transaction history with running balance. Starts with "who you are and what the program has done for you" before diving into details.
