

Tier Card — Unified Membership + Loyalty

How the tier card adapts when a customer has a membership tier assigned on top of their earned loyalty tier.

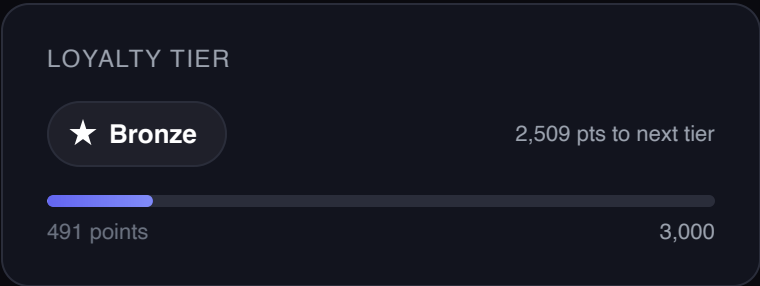

Membership > Earned

Earned: Bronze (1x)
Membership: Platinum (2x)
Shows Platinum + earn progress toward Silver

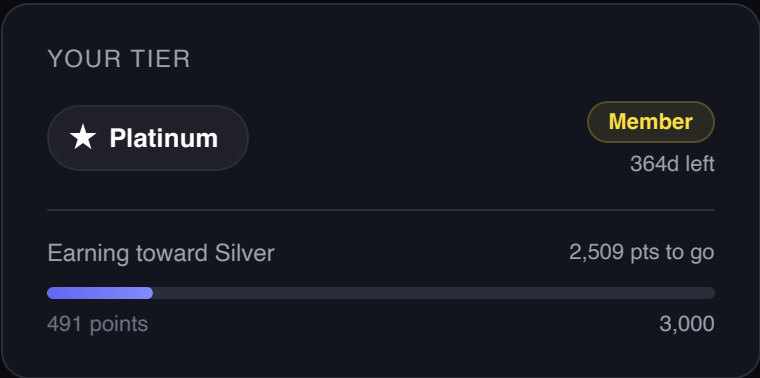

No Membership

Earned: Bronze (1x)
No membership assigned
Same as current behavior

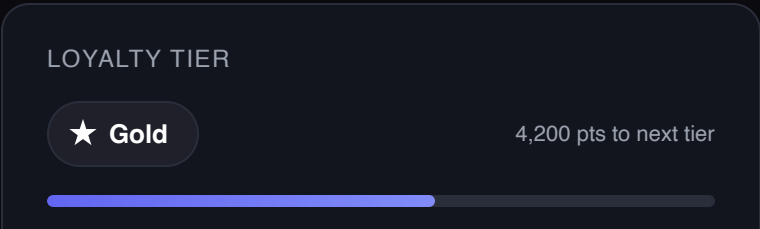

Membership at Max Tier

Earned: Bronze (1x)
Membership: Platinum (2x)
Platinum is the highest tier

Earned Gold, No Membership

Earned: Gold (1.5x)
No membership
Progress toward Platinum

5,800 points

10,000

Max Tier Earned

Earned: Platinum (2x)
No progress bar needed
Shows completion message

LOYALTY TIER

★ **Platinum**

You've reached the highest tier

Design Rules

- 1 Active tier badge shows the effective tier** — whichever is higher between earned and membership. If membership is active and higher, the badge shows the membership tier name.
- 2 "Member" tag + days remaining** appears only when the displayed tier comes from a membership. Absent when showing a purely earned tier.
- 3 Section title changes** — "Your Tier" when membership is active (it's an assigned tier), "Loyalty Tier" when showing purely earned (it's organic).
- 4 Earn progress always shows the organic loyalty progression** — "Earning toward Silver" (the next tier the customer can reach by accumulating points). This never changes based on membership. Label says "Earning toward X" to distinguish from the displayed tier.
- 5 Separated by a divider** — the active tier badge and the earn progress bar are visually separated. The top is "what you have now", the bottom is "what you're working toward".
